

Expro Excellence
Reliable SeaCure[®]
 cementing mitigates
 against risk of stuck BHA

Well Construction | Cementing Technologies

Objectives and background

- Earlier under-gauge drill out of 20" surface casing can cause stuck BHA or even requiring a 17 1/2" clean out trip

Expro Excellence

- Clinical execution SeaCure[®] cementing eliminates SSR plugs and shoetrack enabling slim drill ahead

Value to the client

- Saved SSR plugs, shoetrack, cement head and clean-out bit/BHA costs
- Shoe drilled out under gauge in 15 minutes
- Reduced cement job displacement volume by >30m³
- Saved >10 hours rig time
- Saved >65MT CO₂ emissions
- Delivered zero NPT service execution

**It was easy
 drilling through
 the shoe."**
