

Well Construction

Cementing Technologies | Cure Technologies

QuikCure®

Elevate well temperature post cementing

Features

- Enabled by Expro's SeaCure® technology
- Controlled heat sweep post cement placement
- Temperature modelled by SimCure, wellbore temperature simulator
- No specialized equipment required

Benefits

- ~70% reduction in wait on cement time
- Accelerate early compressive strength development
- Creating a solid well foundation
- Reduce overall well costs
- Field Proven
