

Well Intervention

Delivering the complete package of well intervention solutions across the lifecycle of your wells.

Alongside Expro's global market leading expertise in well intervention services, a number of new strategic alliances allow the delivery of a broader range of well intervention activities, while minimising any costly non-productive time.

Expro is a leading provider of wireline intervention services. Focusing on well performance and service, we provide the complete package of wireline services that run across the lifecycle of your well. Expro's range of wireline intervention services ensures the latest tools are available and our customers are offered optimal solutions

Technology partnerships

Slick-e-line

Coated slickline allows for real time services from a single rig-up enabling both slickline and e-line operations.

In partnership with **PARADIGM**

Colour camera

Colour camera technology visually logs the whole well in a series of 185/360° seamless high resolution images, providing a full view of the wellbore.

In partnership with **VisionIO**

X-ray downhole diagnostic service

A wireline diagnostic service using ground breaking x-ray technology to provide downhole images in any well production fluid allowing you to see and act with certainty.

In partnership with **VISURAY**

Innovative flow control

The plug is deployed, equalised and retrieved using conventional well intervention methods. Deployment is achieved in one run, enabling a reduction in both well intervention risk and subsequent operation cost.

In partnership with **Omega**

Heavy duty wireline fishing services

Minimise costly non-productive time with HD heavy duty wireline fishing services. Customised, fast-response solutions for your well servicing needs.

In partnership with **LiMAR**

Patented coiled hose tubing technology

An alternative to coiled tubing applications, the use of CoilHose is desirable to operators seeking to minimise the loss of hydrocarbon production and to lower overall costs of intervention.

In partnership with **Qi**
