## Central Junction Box

The Slick-E-Line® Central Junction Box is one of the available central boxes of the ParaComm communication system.

They are used to provide both power and communication to the ParaComm DP panel, ParaComm antenna and ParaSheave, but also to communicate with the logging computer with ParaLog or ParaOffice. The box is fitted with connectors to fit the cable assemblies to all particular equipment items.

The central junction box is fitted inside the winch unit with connectors to fit the cabled assemblies to components of the Slick E-Line system. This box is designed for use in Zone 1 explosion hazardous area. The power cable can be either hard wired or connected to the available to the available power source.

Technical specifications	
Temperature rating	-20 /+40 °C
Dimensions (W x H x D)	359 x 290 x 227 mm
Weight	25 kg 55 lbs
Electric supply	230 VAC (optionally 12 or 24 VDC)
Electrical connection	EX PoE with connectors to antenna, DP panel External Ethernet
Power cable	5m leads only or with connector
Bottom connection	Wedged mounting block (lockable)
EX classification	CEEx: II 2G IIB T3 (Zone 1)
Option	A1206730 non explosion proof
Standards	EN-IEC 60079-0, -1, -14 2014/34/EU
