

Well Intervention Logging Services

Are you looking for a rapid Cased Hole suitcase service to assist in diagnosing your well integrity issues?

Expro understands the challenging and unpredictable nature of the onshore energy market, we know that operators cannot always plan for every eventuality.

We are introducing a new rapid mobilisation Cased Hole Suitcase service. We are helping you to avoid surprises that slow or bring your operations to a halt. Our service gives you an instant response, helping you to react to challenges and ensures you return to your work program promptly.

We offer a 24 hour call out service where we offer specialist tooling and engineer support to help you perform your downhole intervention operations, Expro provides crossover / interface to your incumbent wireline provider and offers a range of trigger services (explosive and non-explosive) and surveillance services.

Depending on your requirements, our engineers can be mobilised within 24 hours direct to your site. Please find a list of the off-the-shelf services, we have available from our UK support bases.

Key applications

- Workovers
- Fishing operations
- Well integrity monitoring
- Production monitoring

Features and benefits

- Keeps your operational timing on track, reducing costs
- Rapid response, fast mobilisation
- Non dangerous goods – no restrictions on transportation
- Compact and easily transported
